Pursuing BE from Vidhyavardhini's
College of Engineering and Technology.

I've got 8.75 CGPI (Average) till SEM V

Higher Secondary school (HSC)

Vartak College

2018 - 2020

I've got 86.15 % in HSC

SKILLS

Languages

HTML, CSS, JS, Python, Dart, Java

Frameworks

ReactJS, NodeJS, Flutter, Flask

Databases

MongoDB, Firebase, MySql

OBJECTIVE

I am currently pursuing my B.E. degree at VCET college and am seeking an entry-level role to enhance and further develop my technical knowledge. Over the past three years, I have been actively involved in various coding competitions and was awarded the top prize at the Project Showcase. My strengths lie in design and integration, and I possess excellent problem-solving skills. I am enthusiastic about tackling new challenges and implementing innovative projects. Moreover, I have a talent for translating business requirements into technical solutions. I am eager to begin my career as a software engineer with a reputable company that values technological innovation.

PROJECTS

Music Recommend System

Technology Used : ReactJs, NodeJs, Express Js, MongoDB

- Music based web app which recommend the music according to moods.
- Working on this project as a front-end developer, the entire website was built using React js and was entirely responsive.

FindMyNotes

Technology Used : Django, Mysql

- FindMyNotes is a web app which provides notes to the students uploaded by teachers
- As a frontend developer on this project, I made some web pages using HTML, CSS, and JS

Diet Recommend System

Technology Used : Flutter, Firebase, FastApi

- Flutter based app which provides diet on the basis of user inputs.
- I used Flutter widgets to build the entire user interface, connecting Firebase to it.
- The ML model was integrated using API calling where I used FastApi for it.

RESPONSIBILITIES

Deputy Sponsorship Head - VCET Hackathon' 23

Frontend Head - FindMyNotes project
